- 14.45 cost planning and integration to financials
- 15.00 retirement process – pension administration
- 15:15 management information
- 15.30 discussion, Q&A
- 16:00 estimated end

- decisions of policy and administrative management 1992/1993

## Objectives:

- reducing the rising software maintenance
  - software from the market, in-house developments as a complement
  - common software for the group of companies, City of Essen
  - process optimization and synergies through workflow processes
  - redundancy-free data management and common data structures
  - high integration in all business areas
- ➔ SAP as a strategic software
- changing technologie to client-server solutions
  - know-how transfer from consultants to own staff
  - external consulting only as a complement

## Integration in financial and logistics

## integration in real estate

### Department for real estate

- property
- contracts / rent / lease
- plant management
- new constructions

### Department for geo-information

- property
- valuation

### Department for road and traffic

- plant management for streets, street lamps, traffic lights

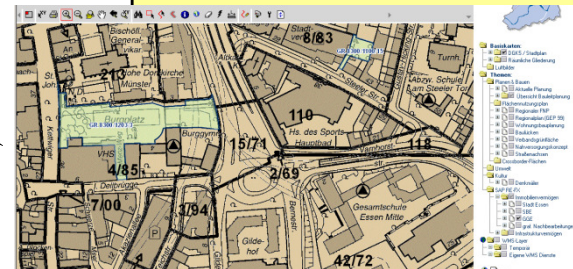

### Company for parks and forests and memorial parks

- plant management

Financial and RE-FX

GIS-Interaction

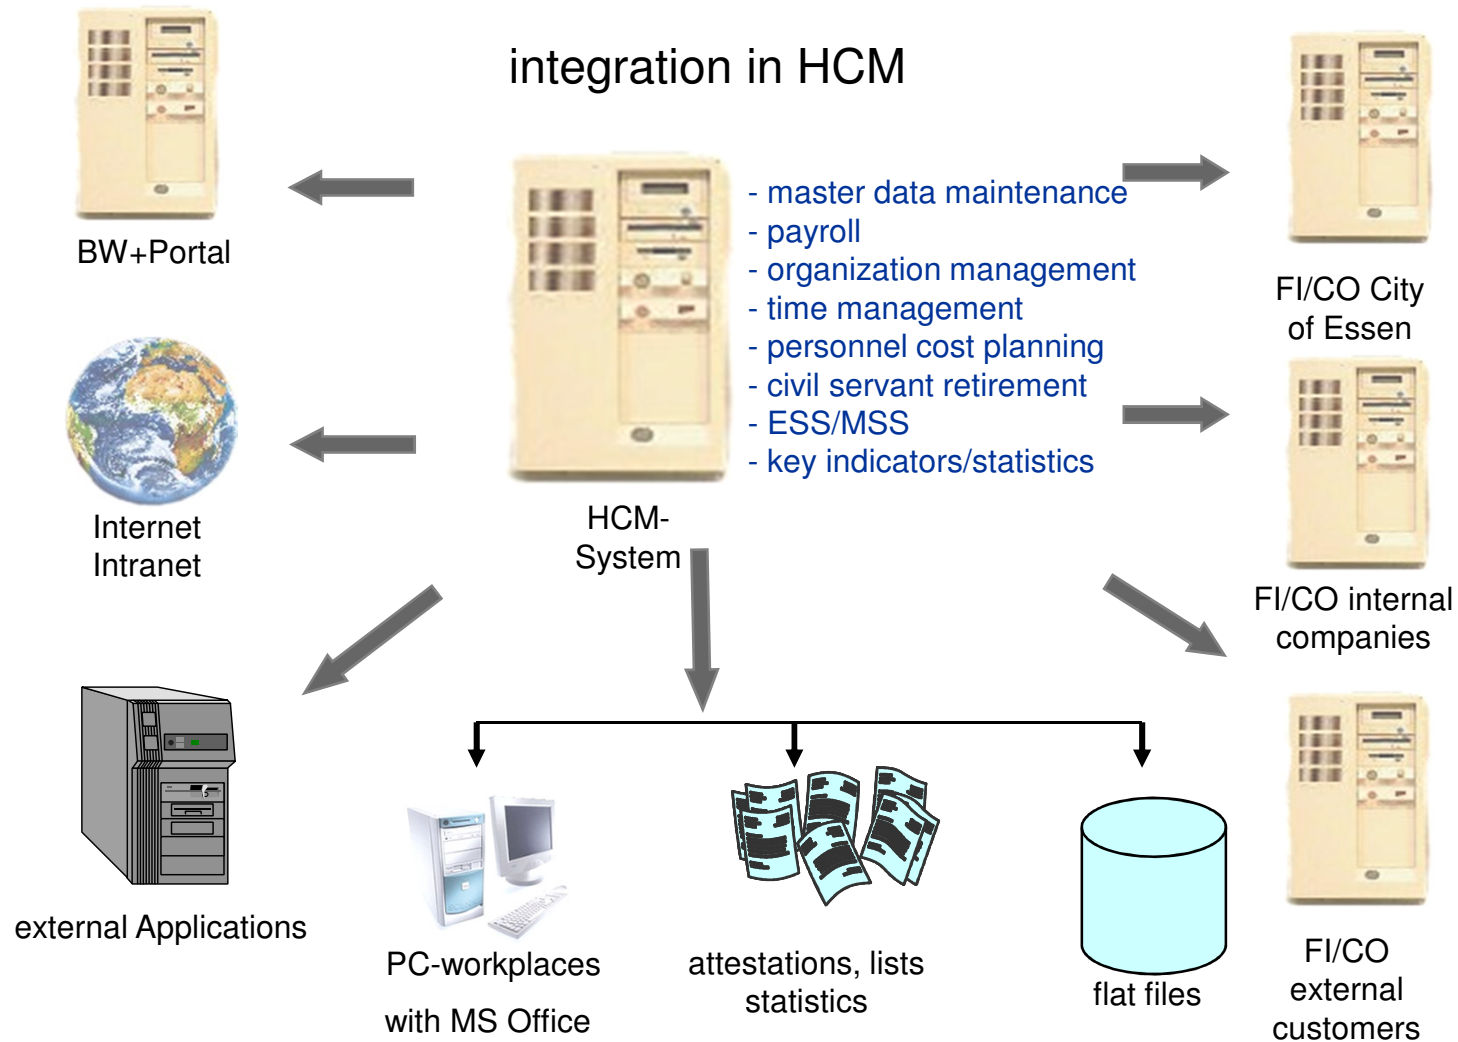

### Department for strategic real estate management

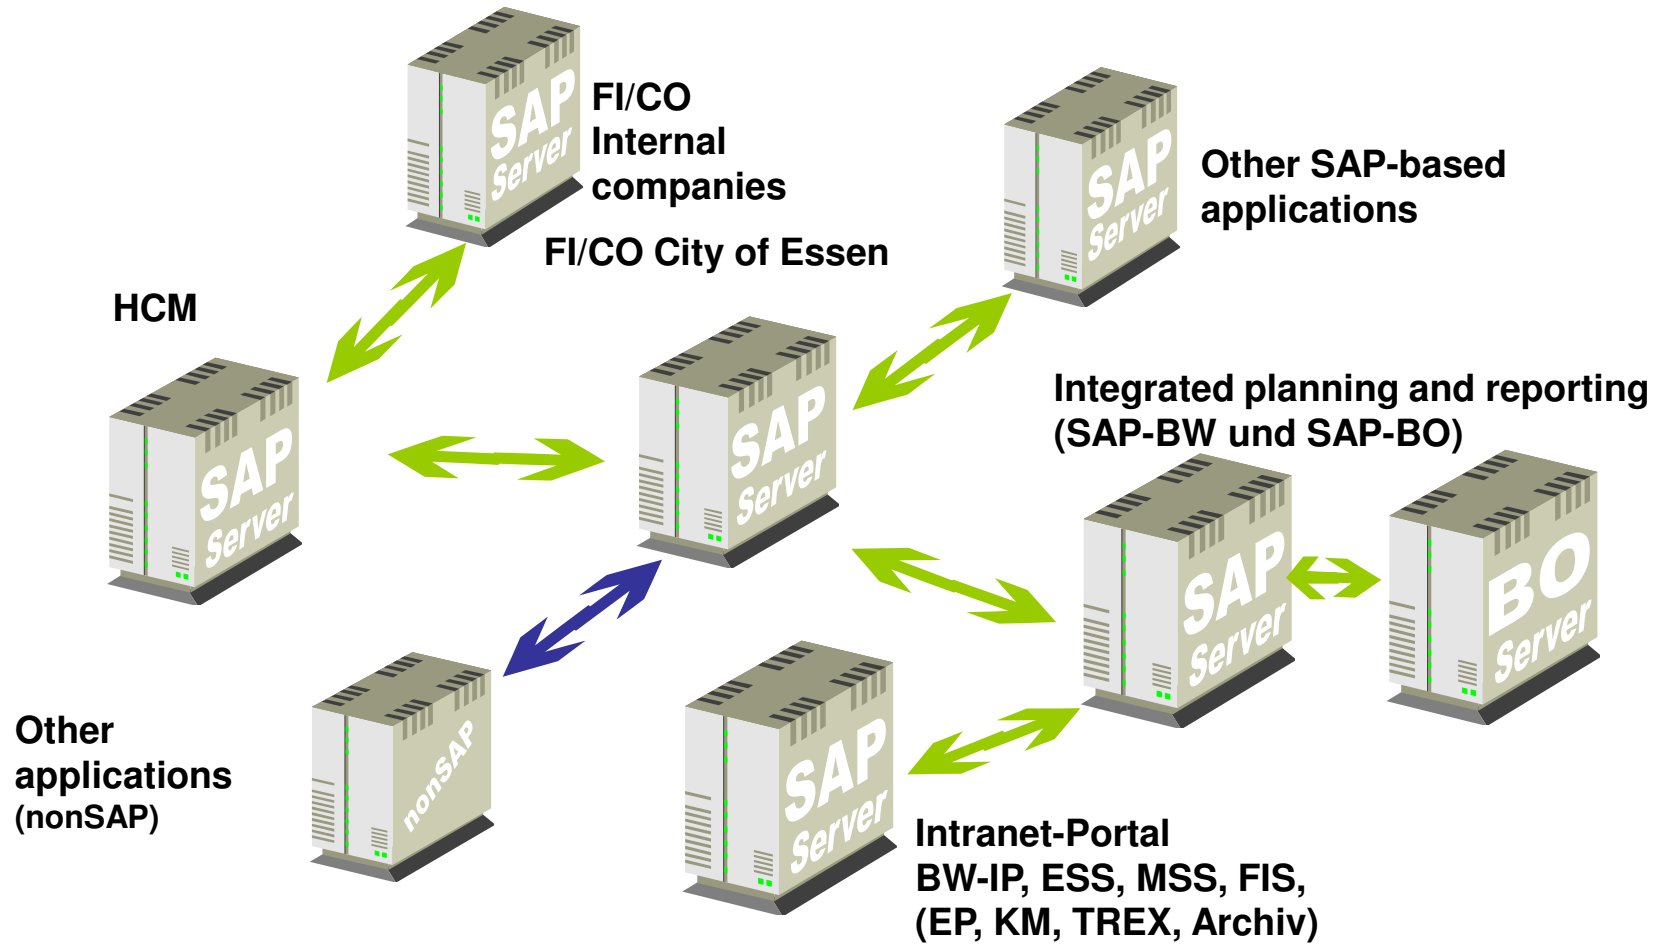

### Department for auditing of accounts

### Department for financial - asset accounting

### Department for purchasing and sale of land or property

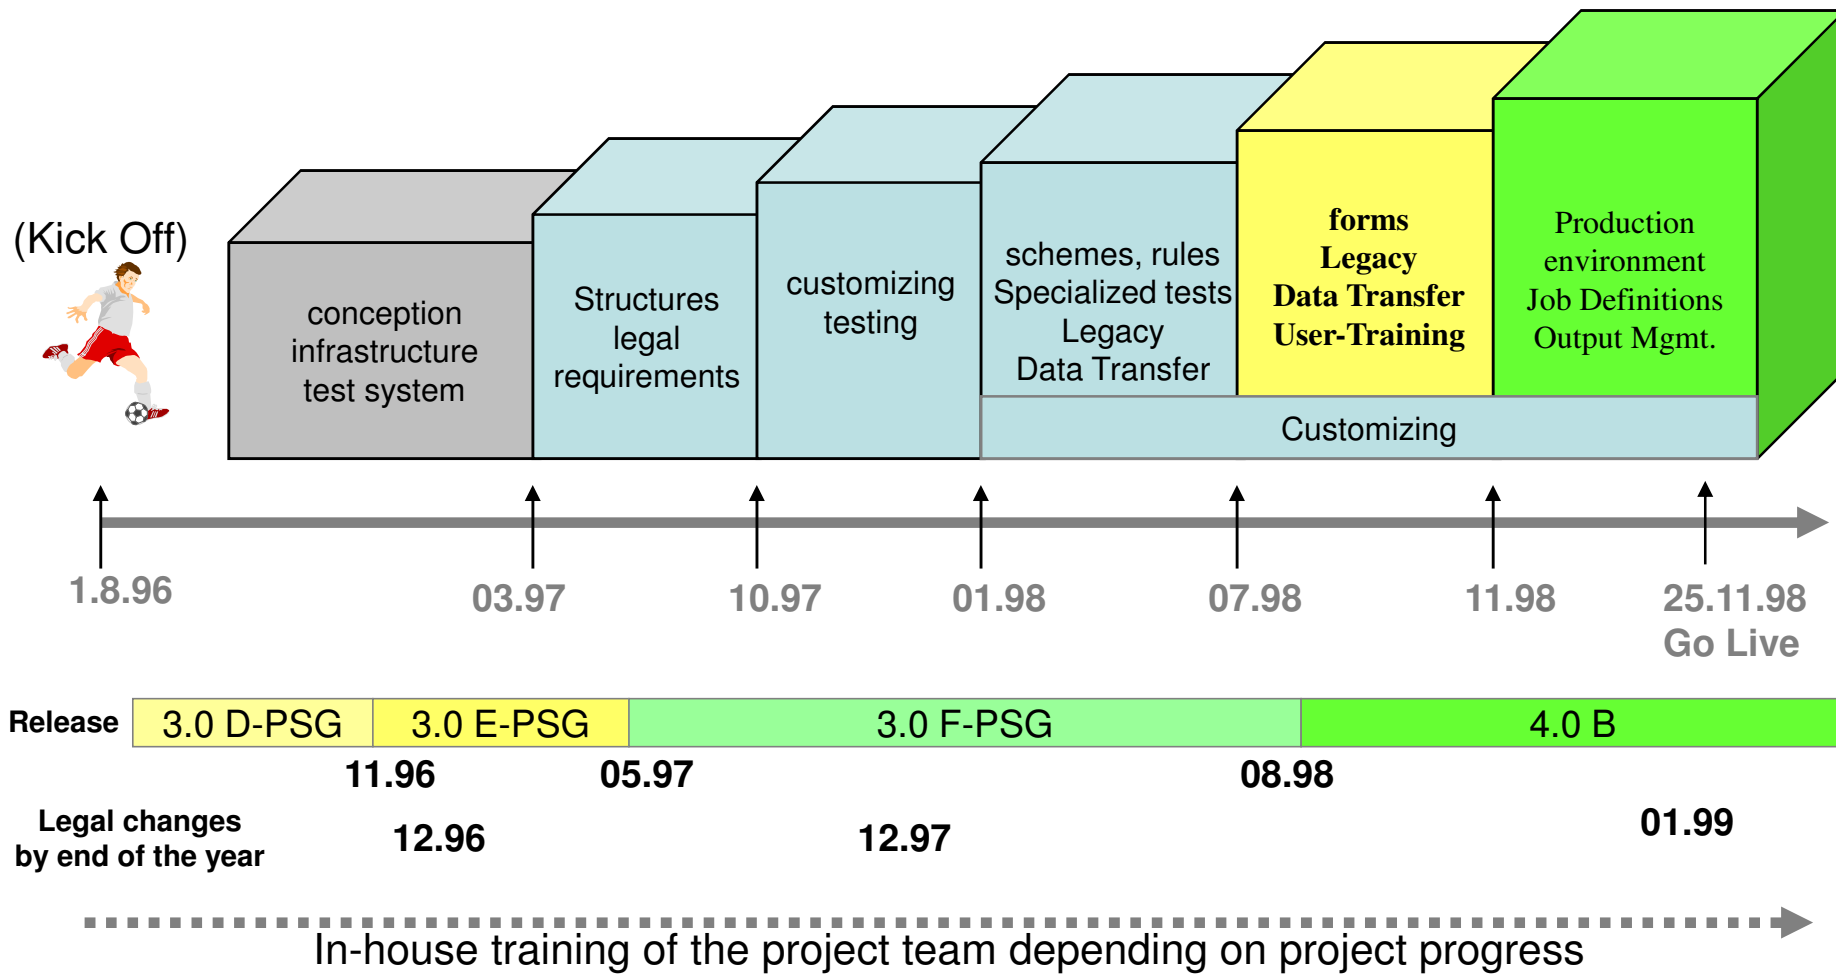

### other departments

- 11:00 welcoming
- 11:15 ESH: who we are
- 11:25 history and use of SAP-Software
- 11:45 **implementation, the project**
- 12:15 coffee break
- 12:30 master data and payroll integration
- 13:00 lunchtime
- 13:45 payroll reporting, attestations, statistics
- 14:15 operation in the data center
- 14.45 cost planning and integration to financials
- 15.00 retirement process – pension administration
- 15:15 management information
- 15.30 discussion, Q&A
- 16:00 estimated end

- **preliminary investigation** Juli 95 - April 96
  - Analysis of requirements
  - Phased approach to implementation
  - Participation in the SAP development group  
“Payroll for Public Sector” from 12.95
- **Implementation** Aug.96 - März 99
  - Master data maintenance
  - Payroll
  - Interface FI/CO
  - Integration of Personal Development (PD)
- **Method**
  - SAP implementation Guide
  - know-how transfer from consultants to own staff
  - Consulting as work-shops

- resources                      08.1996 – 03.1999
  - SAP consultants                      1-2
  - ESH consultants                      7
  - Key user for payroll                      2-3
  - Key user for organization                      1-2
- time spent
  - ESH                      2.176 days
  - SAP consulting                      48,5 days
  - Training the project team                      58 days
  - Development by SAP                      20 days

- **Important structures**

- each customer his own company code, no own client
- extensive differentiation in
  - personnel area / personnel subarea
  - employee group / employee subgroup
  - wage type structure depending on employee group/subgroup
  - payroll area depending on customer and payout date
- 1 client for testing for end users with productive data

- **Benefits**

- less effort in transportation between SAP systems T→Q→P
- better determination for dynamic default values
- higher legality and security in use of wage types for employees
- higher quality and flexibility for reporting and analysis

- **Personnel calculation schema**
    - Transaction PE01 – manually
  - **Personnel calculation rules**
    - Transaction PE02 – manually
  - **Features**
    - Transaction PE03 – manually
  - **Functions and operations**
    - Transaction PE04 – manually
- We not use Business Rule Framework plus (it didn't exist in 1996-1999)
- **Add-on solutions as extensions**
    - Clone and Test (Accenture)
    - HCM Audit and Compliance (Accenture)
    - Pension provisions (DConHR)

- 11:00 welcoming
- 11:15 ESH: who we are
- 11:25 history and use of SAP-Software
- 11:45 implementation, the project
- 12:15 coffee break
- 12:30 **master data and payroll integration**
- 13:00 lunchtime
- 13:45 payroll reporting, attestations, statistics
- 14:15 operation in the data center
- 14.45 cost planning and integration to financials
- 15.00 retirement process – pension administration
- 15:15 management information
- 15.30 discussion, Q&A
- 16:00 estimated end

- organization management
  - automatic cost distribution of
    - position,
    - job or
    - organizational unitfor personnel cost planning and FI/CO integration.
- determination for dynamic default values (pay scale, wage types etc.) depending on
  - enterprise structure or personnel structure
- (retroactive) change of payroll-relevant data cause a recalculation
  - IT0008, IT0012, IT0013, IT0014, IT0015, IT2001 and other
- changing payment level depending on age or time and pay scale by running a report (RPIPSR00)

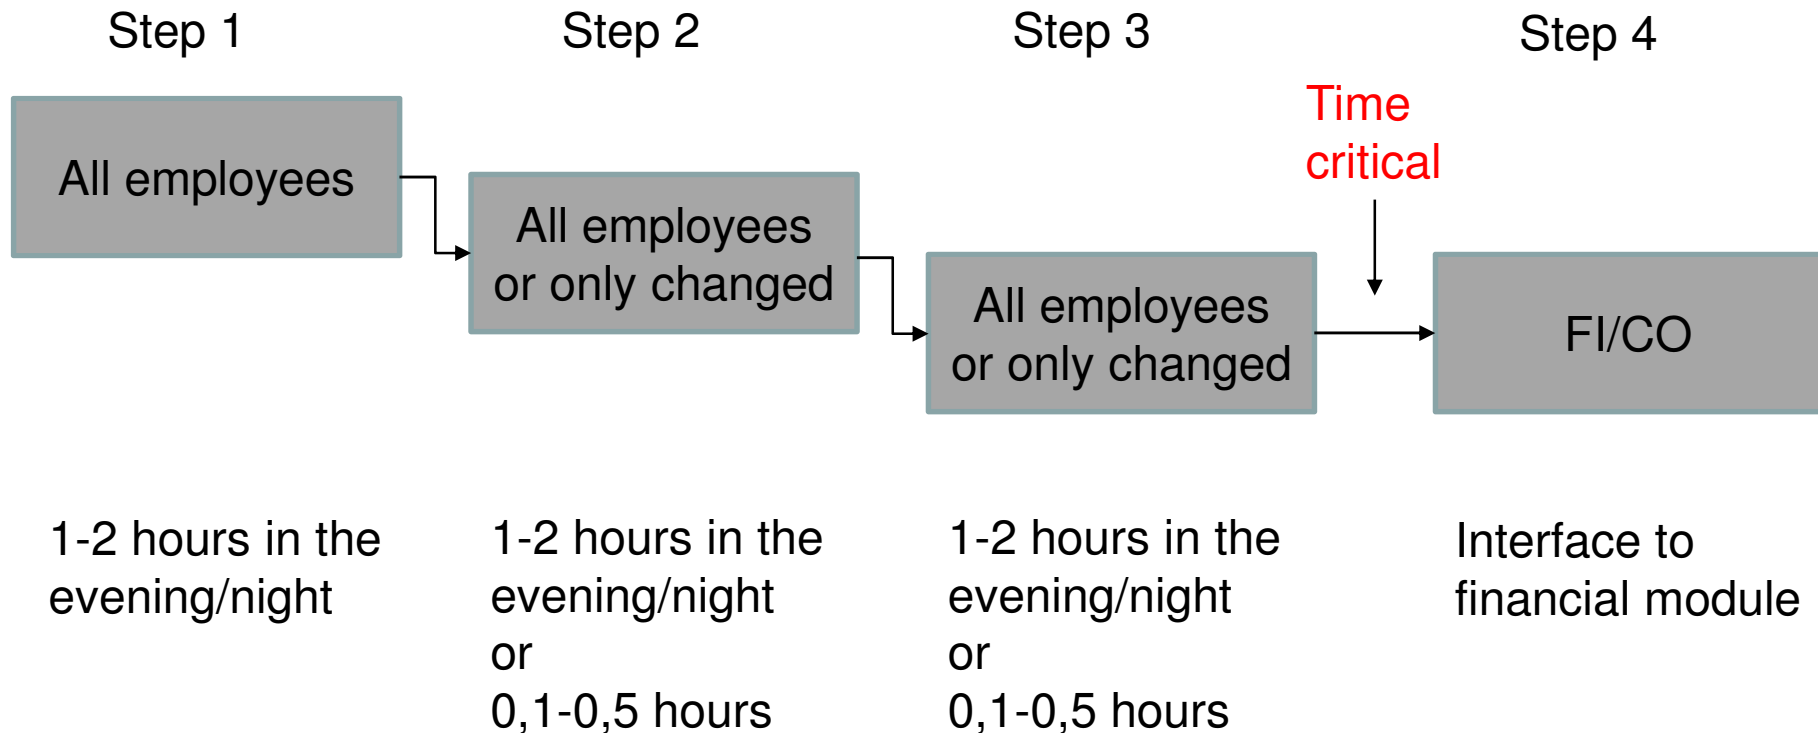

- 11:00 welcoming
- 11:15 ESH: who we are
- 11:25 history and use of SAP-Software
- 11:45 implementation, the project
