SUBJECT: **NATO MILITARY TRAINING AND EXERCISE PROGRAMME (MTEP)  
2021-2025**

DATE: 23 September 2019

REFERENCES: A. MC 0458/3, NATO Education, Training, Exercise and Evaluation (ETEE) Policy, dated 03 September 2014.  
B. SH/SDP/J7/PLL/KM/19-002676(INV), SACEUR's Annual Guidance on Education, Training, Exercises and Evaluation 2021, 08 August 2019.  
C. ACT Directive 75-004, MTEP, 7 July 2016.

1. The MTEP 2021-2025 constitutes my direction for NATO Collective Training and Exercises for the year 2021, and the plan for the four subsequent years. Enclosed at Annex A is the MTEP 2021-2025 – Chapter 1: Exercise Schedule, which is effective 01 January 2021.
2. The MTEP is developed in accordance with Reference A, governed by the requirements, priorities and guidance set forth in Reference B. Further, it has been coordinated across the NATO Command and Force Structure Headquarters and with Allied and Partner nations, in accordance with procedures laid out at Reference C.
3. The MTEP 2021 is submitted to the Military Committee (MC) for notification. I recognize that Allies retain the right to request North Atlantic Council (NAC) approval for specific Exercise Specifications (EXSPEC) on a case-by-case basis. The Partner portion of the MTEP 2021 will be forwarded separately for endorsement by the MC and approval by the NAC.
4. The MTEP 2021 has been further developed to improve guidance for the follow-on Exercise Planning Processes, by including directions on Operations (Article 5 / Non-Article 5 Crisis Response Operations), Exercise Level (Major Joint Operation / Small Joint Operation), Exercise Setting / Scenario, and Mutual Training Support Responsibilities.
5. MTEP 2021 and the Draft MTEP 2022-2025 reflect long-term planning and programming to meet NATO's Education and Training objectives. I recognize that MTEP 2021 represents an ambitious exercise programme and that changes may be necessary due to fiscal constraints realized throughout the year. I also recognize the impact of current events on the evolving security environment and guidance on short-term assurance measures provided by the MC and SACEUR may impact the MTEP 2021. Therefore, MTEP 2021 is released with my commitment

**NATO UNCLASSIFIED**

Releasable to North Macedonia, PfP, MD, ICI, PatG

to maintain the flexibility and agility necessary to manage changes during implementation. When required, MTEP 2021 will be modified appropriately in accordance with Reference C to meet any additional guidance received.

6. MTEP 2021-2025 has been programmed according to SAGE 21 and is subject to change as the dates for major strategic level exercises are refined in accordance with Reference C.

7. This document provides only a snapshot in time of the Exercise Programme, which is continuously updated via the electronic MTEP (eMTEP). The eMTEP is available for viewing on the unclassified network at the following link: <https://emtep.exonaut.com>. The full MTEP is available on request by partner nations lacking eMTEP access via the SHAPE Partnerships Directorate.

8. Should there be any question, the HQ SACT Points of Contact are CDR Scott Welles (USA N), NCN 555-3620, [scott.welles@act.nato.int](mailto:scott.welles@act.nato.int), and LTC Eugene Palka (USA A), NCN 555-3541, [Eugene.palka@act.nato.int](mailto:Eugene.palka@act.nato.int).

A handwritten signature in black ink, appearing to read 'André Lanata', written over a horizontal line.

André Lanata  
General, French Air Force  
Supreme Allied Commander Transformation

Train Striking and Support Force NATO (SFN) as JTFHQ(ME) in support of the NRF deployment then train and evaluate as JFTHQ(ME) in support of MJO+ operation. Enhance NATO's responsiveness within its North-Eastern AOR while practicing deployment and operational arrangement with local actors such as Host Nations (HN) Multinational Corps Northeast ( MNC-NE) NATO Force Integration Units (NFIU) and enhanced Forward Presence (eFP) Battel Groups (BG). Contribute to NATO's D2 posture demonstrating the capability to handle an escalation from a NRF deployment to the conduct of MJO+ scale Collective Defence Operations. this includes the Force-Generation process needed to manage the transformation when initial entry forces on dedicated readiness (VJFT, Standing Naval Forces,(SNF), Immediate Follow-on-Forces Group(IFFG) etc.) are to be relieved in battel (mapping actual forces available ). NFS key leaders will have close-hold vignette-based discussions on the impact to the conventional campaign when there are changes to NATO Dual-Capable Aircraft (DCA) posture. Practice Advanced Plans concepts/methodology ( without using the actual Advanced Plans )</i></p> <p><b>NATO Priority:</b> Pri 2B Contingency Ops (Trg &amp; Cert fo the JHQs)  <b>Event Type:</b> Command Post Exercise (CPX)  <b>Article 5:</b> Yes: Article 5  <b>Mission Type(s):</b> Collective Defence (CD)  <b>Domain Focus:</b> Joint Operations  <b>Functional Focus:</b> Operations Planning and Assessments  <b>Capability Development or Mission Enhancement:</b> N/A  <b>Event Areas/Remarks:</b> TBD  <b>Date Remarks:</b> Planned to be executed in second quarter of 2022. <p><b>STEADFAST JUPITER 23-2</b> MTEP Chapter 1 - NHQ and NCS CT&amp;E Events</p>	<p><b>Start date</b> 6/5/23 <b>End date</b> 7/3/23</p>	<p><i>STEADFAST JUPITER 23-2 is an Article 5 high intensity operation exercise to train the MJO+ C2 and evaluate JFCBS as JTFHQ conducting Collective Defence Operations at MJO+ scale in coordination with appropriate regional NATO C2 and NNA's. Train Striking and Support Force NATO (SFN) as JTFHQ(ME) in support of the NRF deployment then train and evaluate as JTFHQ(ME) in support of MJO+ operation. Enhance NATO's responsiveness within its North-Eastern AOR while practicing deployment and operational arrangement with local actors such as Host Nations (HN) Multinational Corps Northeast ( MNC-NE) NATO Force Integration Units (NFIU) and enhanced Forward Presence (eFP) Battel Groups (BG). Contribute to NATO's D2 posture demonstrating the capability to handle an escalation from a NRF deployment to the conduct of MJO+ scale Collective Defence Operations. this includes the Force-Generation process needed to manage the transformation when initial entry forces on dedicated readiness (VJFT, Standing Naval Forces,(SNF), Immediate Follow-on-Forces Group(IFFG) etc.) are to be relieved in battel (mapping actual forces available ). NFS key leaders will have close-hold vignette-based discussions on the impact to the conventional campaign when there are changes to NATO Dual-Capable Aircraft (DCA) posture. Practice Advanced Plans concepts/methodology ( without using the actual Advanced Plans )</i></p> <p><b>NATO Priority:</b> Pri 2B Contingency Ops (Trg &amp;Cert fo the JHQs)  <b>Event Type:</b> Command Post Exercise (CPX)  <b>Article 5:</b> Yes: Article 5  <b>Mission Type(s):</b> Collective Defence (CD)  <b>Domain Focus:</b> Joint Operations  <b>Functional Focus:</b> Operations Planning and Assessments  <b>Capability Development or Mission Enhancement:</b> N/A  <b>Event Areas/Remarks:</b> TBD  <b>Date Remarks:</b> Planned to be executed in second quarter of 2023. 	<b>Page</b>
1. INTRODUCTION	D-2
1.1 Purpose of CD&E Annex	D-2
1.2 Concept Development & Experimentation	D-2
1.3 Experimentation	D-3
1.4 Venue	D-3
2. EXECUTION	D-5
2.1 Experiment Integration	D-5
2.2 Accessing Concept Development & Experimentation Activities	D-5

## **1. INTRODUCTION**

### **1.1 Purpose of CD&E Annex**

- a. This CD&E Annex:
  - (1) Describes the CD&E process with a focus on Experimentation in exercise venues.
  - (2) Discusses requirements and criteria of venue selection.
  - (3) Provides information to access ACT's CD&E Programme of Work.
  - (4) Identifies potential venues for experimentation.

### **1.2 Concept Development & Experimentation**

- a. The NATO Documents MC-0583 (MC Policy for NATO Concept Development and Experimentation) and MC-0056-2010 (NATO Concept Development and Experimentation (CD&E) Process) put forward CD&E as an innovative and flexible approach to providing credible solutions to capability shortfalls. The inclusive and iterative nature of CD&E aims at capturing the best ideas and enables potential solutions to be thoroughly explored through Concept Development and decisively tested through Experimentation, either within NATO or collaboratively with nations. Using the rigorous approach to capability development within the CD&E process, NATO can determine optimal solutions to identified capability shortfalls.
- b. Generally, a conceptual gap, based on minimum capability requirements or from lessons identified and learned, provides the rationale for development of a capability. This conceptual gap may be filled by one or more changes in the associated DOTMLPFI (Doctrine, Organisation, Training, Material, Leadership, Personnel, Facility, and Interoperability) spectrum. CD&E provides a method to explore, refine, assess, validate and demonstrate new conceptual ideas to identified capability shortfalls and gaps in a forward looking and innovative way.
- c. CD&E is applicable, and has been used extensively with success, for informing Strategic Thinking, for Capability Development, and to support enhancements to Education and Training. It is also successfully supporting ACT's Warfare Development agenda. The application of the CD&E introduces special evaluation and control mechanisms in order to ensure a level of quality that mitigates identified risks and, concurrently, supports innovative thinking. CD&E has been recognised as a key enabler to the NATO Defence Planning Process (NDPP), particularly in NDPP Step 2 (determine requirements), Step 3 (apportion requirements and set targets) and Step 4 (facilitate implementation). Beyond the NDPP, CD&E contributes to solution finding and innovative approaches in challenges identified via Lessons Learned, Crisis Response Operations Urgent Requirements, and in the output from Research and Technology developments.

## **NATO UNCLASSIFIED**

Releasable to North Macedonia, PfP, MD, ICI, PatG

d. 'Concept development', 'experimentation' and 'analysis' are the three main methodologies used during a CD&E project. While concepts could be developed in many different ways, only the utilisation of these three methodologies together guarantees the sound practice of analysis and qualitative assessment of conceptual solutions. The characteristic and the intensity of these individual elements can be different, depending on the topic. None should be excluded at the beginning of a CD&E project and their use must be considered at each stage of the development cycles (spirals of development).

### **1.3 Experimentation**

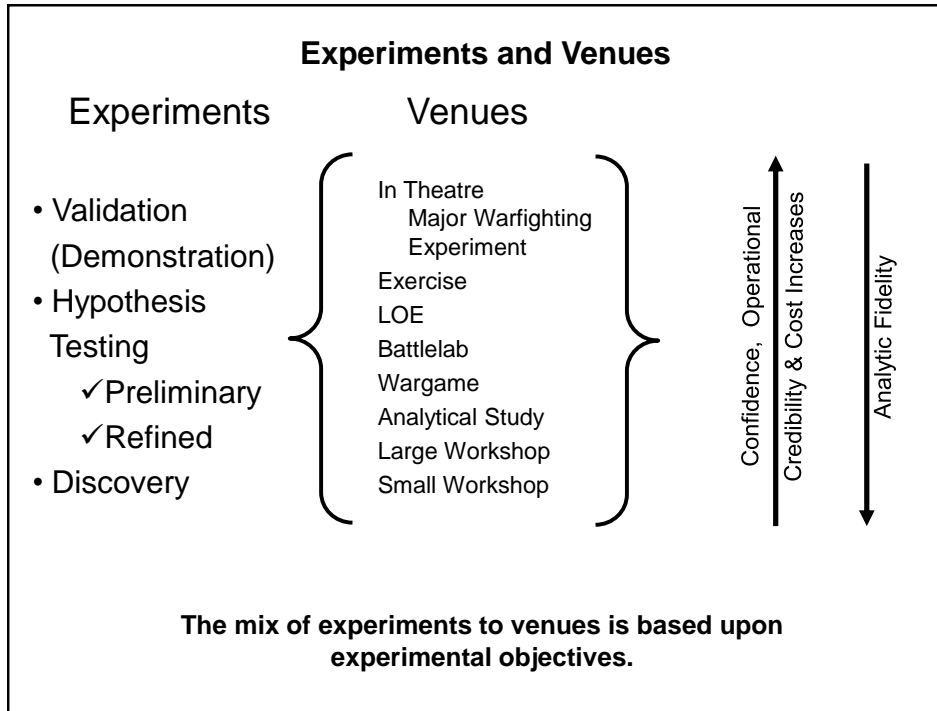

a. The role of experimentation is primarily to discover information, confirm or disprove a hypothesis, or provide formal validation that a concept under development will achieve its desired aim. Experimentation uses real (or near-real) environments to gain awareness of more diverse levels of information and insight not available from traditional means such as operational analysis or lessons learned analysis.

b. Benefits of experimentation for capability development include: reduced uncertainty (risk mitigation); objective evaluation of innovations; identification and possible solution of practical problems that cannot be determined through studies and analysis alone; and provision of empirical evidence to inform policy, budgetary and procurement decisions.

c. Integration of experimentation into concept development provides opportunities to discover, refine, hypothesize and validate conceptual ideas within the context and throughout the progress of a concept. In each step of experimentation, a thorough analytical effort has to be made to ensure that the derived outputs result from the use of a rigorous scientific method. Analysis of results can also lead to change in CD&E project courses of action, or may indicate that some experiments scheduled later can be cancelled or that other experimentation activities are necessary. Moreover, experimentation can also exploit a "negative" outcome as a way to refine concepts.

### **1.4 Venues**

a. ACT representatives work within the relevant exercise forums to facilitate appropriate experimentation venues. The aim is to find suitable venues to support the Experimentation Plan, while ensuring that experimentation objectives are maintained. Figure 1 depicts the variety of venue types that support experimentation.

**Figure 1. Experiment Venues**

b. As the level of experimentation matures, so does the type of venue suitable for hosting the experiment as well as the experiment's costs. Initial discovery experimentation may be small scale, lower cost, and done in workshops, as an analytical study or possibly as a war game. Hypothesis experimentation may be executed in a Concept Development and Assessment Game (CDAG), in a battle lab environment such as the Small Lab Environment (SLE), or in a specifically designed Limited Objective Exercise (LOE). Validation experimentation (demonstration of prototype capability) is much more rigorous, generally requires an operational exercise, and thus is more costly. The benefit is that the greater the operational context of the venue, the greater the confidence that the experiment outcome translates to operational credibility.

c. In most cases, it is a validation experiment that is brought into an MTEP event. Regardless of the experiment's type, a requirement for its integration into an exercise is that it not adversely affect the attainment of the Commander's objectives for that exercise.

d. In order to support concept development, experimentation must take place in venues which offer an environment that ensures the observation and collection of all relevant data. Therefore, it is indispensable that experiments have all necessary resources available and are conducted and controlled so that disturbing factors which might distort experiment results can be excluded.

## **NATO UNCLASSIFIED**

Releasable to North Macedonia, PfP, MD, ICI, PatG

### **2. EXECUTION**

#### **2.1 Experiment Integration**

- a. ACT's experimentation programme is developed with a focus on concepts, experiments and venues that support capability development requirements embodied in the Bi-SC Strategic Vision document.
- b. NATO Response Force (NRF) and NATO Command Structure (NCS) Exercises represent major events for NRF/NCS development and provide good venues for experimentation. Other Allied Command Operations (ACO) sponsored exercises, as well as JFC-led exercises, may also serve as experimentation venues, the sum of which provide a coherent series of concept development events.
- c. ACT continues to participate in the Multinational Capability Development Campaign (MCDC) (previously the Multinational Experiment (MNE) series) to gain multinational perspectives on current capability development initiatives. The MCDC series is a multinational solution development initiative led by the United States that aims at collaboratively developing and accessing concepts and capabilities that can be used to address the challenges associated with conducting coalition and multinational operations.
- d. The MCDC series is composed of consecutive campaigns – each with an overarching theme, and focus areas – varying in quantity from campaign to campaign and each addressing a specific problem set through the use of CD&E and other methods.
- e. Other potential experimentation venues are Air, Land, and Maritime Component Commander (ACC, LCC, and MCC) focused events (such as BRILLIANT/NOBLE/LOYAL or DYNAMIC series of exercises).
- f. In addition, ACT also looks for experimentation opportunities in national exercises that have multinational participation.

### 2.2 Accessing Concept Development & Experimentation Activities

a. Since the MTEP is published prior to the approved funding for ACT's experimentation programme, the specifics of CD&E activities are not available for inclusion in this Annex. Information pertaining to CD&E can be accessed through the CDE 365 page hosted on TRANSNET at <https://cde.transnet.act.nato.int/SitePages/Home.aspx>.

b. To gain access to CDE 365, the CD&E collaboration site hosted by Operational Experimentation at HQ SACT, go to the unclassified page link at <https://portal.transnet.act.nato.int> that will allow you to register for an account. To register, follow the following steps:

- (1) Click the register button under TRANSNET at the top of the page.
- (2) A form will appear:
  - (a) Fill in personal information
  - (b) Must have a work email
  - (c) Under Permissions Requested, select CD&E 365
  - (d) Type name in box at bottom of page in order to accept user agreement
  - (e) Hit "submit" button at bottom right
- (3) After registering, you will receive a password and username within 5 work days. Once you have this information, you can use the Login button to access the CDE 365.

c. Interested CD&E Community of Interest (COI) stakeholders may contact ACT's CD&E COI using the following group e-mail address on the unclassified network: [opex@act.nato.int](mailto:opex@act.nato.int).

(POCs: [David.Beckwith@act.nato.int](mailto:David.Beckwith@act.nato.int), [caroline.leichtnam2@act.nato.int](mailto:caroline.leichtnam2@act.nato.int) from SACT JFD OPERATIONAL EXPERIMENTATION BRANCH)
