#### Arrivals

Arrivals: The IMSO will pick up all IMS arriving to the Richmond International Airport except those arriving on a US Holiday and those who get rental cars from the airport. There are several taxis at the airport, but it is recommended that you use the James River taxi service as they are the most cost effective. All IMS arriving at midnight or later or on a US Holiday, will take a taxi from the airport to the IHG Army Hotel. The cost of the taxi should be approximately \$36.00 if you use James River Taxi. Request a receipt from the driver. Upon arrival to the IHG Army Hotel front desk, they will have a welcome bag for you.

#### Departures

Every IMS will complete an out processing sheet. The out processing sheet will be placed in your IMSO mailbox. The out processing sheet, your ID card and all dependent ID cards must be turned in to the IMSO on graduation day. Transportation to the airport is at the student's expense. Students who receive TLA from this training location will receive your taxi allowance in your last pay. Upon settling your voucher in country, you will need to have a copy of the taxi receipt as proof of payment, if not you will owe.

Release from training during these holidays are 100% dependent upon instructor approval. Training will always take priority.<br>Passport/Visa/I-94: (Recommended entry with local refinement) ItÆs recommended that IMS carry their passport and visa with them at all times. The U.S. Visa is the authority to travel to the United States during the valid period; it has no relation to the period of stay in the United States. The Form I-94 is the Department of Homeland SecurityÆs Arrival / Departure Record issued to the IMS. Rather than distributing a paper Form I-94, the IMSÆs passport will be scanned generating an electronic arrival record. The U.S. Citizenship and Immigration Services (USCIS) will issue an automated Form I-94 to the IMS when they enter the United States at air or sea ports of entry and place an admission stamp on their travel document (a paper version of the I-94 may be obtained at [www.cbp.gov/I94](http://www.cbp.gov/I94)). IMS arriving via ground transportation will receive a paper Form I-94 and the USCIS Inspector will write a date or "D/S" (duration of status) on the Form I-94. This date, in conjunction with the ITO, forms the documentation that governs the IMS status in the United States. Each IMS is responsible for his/her own travel documents. If there are any discrepancies IMS should contact his / her embassy to correct the problem immediately. Only their embassy can change a passport. Mailing of passports should always be via øRegistered Mail, Return Receipt Requested.ø All IMS are required to have minimum six (6) months remaining on their passport upon completion of training and returning to their country.<br>Schools: IMS accompanied by their families, including school-age children, may wish to enroll the children in school. Immunization records will be required for school registration. **Course Description:**  
FORMALLY CLB 020

The Baseline Maintenance module reviews the concepts associated with performance measurement baseline maintenance. It reviews the five earned value management system guidelines and three common terms associated with baseline maintenance. It describes the two most common charts used by earned value managers: the Contract Performance chart and the cost/schedule variance earned value management metrics chart. It continues by defining what a front-loaded baseline, rubber baseline, over-target baseline, and single-point adjustment mean in the context of earned value management. It concludes by using a hypothetical database to depict the effects of contract modifications, management reserve use, front-loaded baselines, rubber baselines, over-target baselines, and single-point adjustments upon the contract performance and cost variance charts.

Nearest Military Base(s): Ft. McNair, Virginia National and Religious Holiday: The IMS in training with U.S. personnel will not be routinely excused from class for prayer or holidays. However, schools are encouraged to permit IMS in good academic standing to observe the two holidays per year selected by their countries provided critical training or testing is not scheduled. The two holidays are chosen by the countries, and published in the Combined Education and Training Program Plan. The DISAM places the compiled list on the SAN Web. Holidays are permitted only if a student is in good standing in class and classes missed do not include a major requirement or exam. Release from training during these holidays are 100% dependent upon instructor approval. Training will always take priority. Packing List: not applicable. Passport/Visa/I-94: (Recommended entry with local refinement) It is recommended that IMS carry their passport and visa with them at all times. The U.S. Visa is the authority to travel to the United States during the valid period; it has no relation to the period of stay in the United States. The Form I-94 is the Department of Homeland Security's Arrival / Departure Record issued to the IMS. Rather than distributing a paper Form I-94, the IMS's passport will be scanned generating an electronic arrival record. The U.S. Citizenship and Immigration Services (USCIS) will issue an automated Form I-94 to the IMS when they enter the United States at air or sea ports of entry and place an admission stamp on their travel document (a paper version of the I-94 may be obtained at [www.cbp.gov/I94](http://www.cbp.gov/I94)). IMS arriving via ground transportation will receive a paper Form I-94 and the USCIS Inspector will write a date or "D/S" (duration of status) on the Form I-94. This date, in conjunction with the ITO, forms the documentation that governs the IMS status in the United States. Each IMS is responsible for his/her own travel documents. If there are any discrepancies IMS should contact his / her embassy to correct the problem immediately. Only their embassy can change a passport. Mailing of passports should always be via Registered Mail, Return Receipt Requested. All IMS are required to have minimum six (6) months remaining on their passport upon completion of training and returning to their country. Schools: IMS accompanied by their families, including school-age children, may wish to enroll the children in school. Immunization records will be required for school registration. IMSO staff will assist you in determining additional local requirements and which school is appropriate for your child/children. Course Scope:

Course content and instructional techniques are designed to provide participants with a knowledge and understanding of military applications of ORSA methodologies. A significant portion of the instruction will be from graduate level Operations Research Systems Analysis text. The classroom presentations will emphasize principles, demonstrate techniques of analysis, and illustrate typical applications of the analytical techniques. Each area of instruction is accompanied by practical exercises which are expected to be worked in the group problem solving sessions as well as outside of the scheduled class time. These exercises, examinations given during class, and case studies are graded to determine the student's comprehension and mastery of the material. A capstone ORSA study is conducted to provide experience with analyzing a problem as it relates to force structure analysis, campaign analysis, or weapon systems analysis under the Army Study Program.

Inter-Service Training Review Organization (ITRO) Resource Requirements Analysis (RRA), for 5J-49A/9E-SI4B, ORSA Military Applications (Previously ALMC-SB (SA) PH 2 (1)) has been approved by HQDA as of 27 Mar 07 in support of consolidation of USA and USAF training.

All CASCOM courses will introduce the major principles of Character Development during in-processing, and will further reinforce that information in subsequent lessons as applicable.

**Special Information:**

Graduation Requirements: (Subject to provisions of TR 350-6)

NOTE: All training specified below, as required for graduation, will be made up if missed, and must be recorded on the Individual Training Record for IET Soldiers and DA Form 1059 for MOS-T Soldiers. The Soldier will be required to meet the performance/learning objectives specified in the POI for the instruction missed. Time required for makeup training will be determined locally.

(1) Pass the APFT with a minimum of 60 points in each event.

(2) Load Wheeled and Tracked Vehicles aboard Cargo Vessel.

This task involves manually moving heavy cargo gear as well as operating heavy machinery to lift pallets and containers (containing tiedowns and slings) that can be cumbersome to manipulate in small areas. In addition, cargo specialist must be able to use hand trucks safely and carry large loads within a cargo hold and use guides, ropes, hooks and cables to line vehicles up perfectly. The hours are long (12 hour shifts) and require working in all kinds of weather conditions, from sweltering heat to subzero temperatures. A cargo Specialist has to be in peak physical condition to perform well.

Optimum agility and coordination is required, as well as the ability to work quickly and efficiently to meet stringent deadlines for vessels entering and exiting ports. Stands, bends, stoop, kneel and crouch most of the time to lift lumber, vehicle lashing assemblies (VLAs), and pushes or pulls lumber and VLAs into position to hook or secure under vehicle tires or tiedown points. Our vehicles today dressed in all their protective armor weigh considerably more requiring the use of the heavier VLAs, (35k and 70k) weighing 26 to 82 lbs. Most tracked vehicles require the heavier VLAs.

Lifting Assemblies (sling sets, bridal sets, spreader bars) weighing 572lbs are used to lift vehicles onto ships like the FSS and LMSR. Soldiers occasionally lifts the 572 pounds and carries 3 feet as part of a 4 Soldier team. When crane hook can sway to the lifting assembly two Soldiers may lift only half the sling/weight to get it onto the crane hook (Prorated 143lbs per Soldier).

The Crane operator must climb 25 ft to get into Hagglund Cranes. Occasionally Cargo Specialist climb over vehicles to get to others when stowed vehicles require additional lashings to stabilize. Utility trailers are frequently disconnected from prime movers IOT speed up stowing then reconnected to prime movers after being stowed. Frequently lifts and carries 140lbs 6 ft as part of a 2 Soldier team (prorated 70lbs per Soldier). Movement within a vessel during stowage operations is heavy with red and green lights to guide drivers and pedestrians when approaching ramps, doors, etc. Color discrimination required. Finger dexterity required.

(3) Complete all mandatory classroom instruction.

(4) Pass all Hands-on/Written evaluations.

- a. ENVIRONMENTAL: AR 200-1 delineates TRADOC responsibilities to integrate environmental requirements across Doctrine, Organization, Training, Materiel, Leadership, Personnel, and Facilities (DOTMLPF) and ensure all training procedures, training manuals, and training doctrine include sound environmental practices and considerations. The Army's environmental vision is to be a national leader in environmental and natural resource stewardship for present and future generations as an integral part of all Army missions. This program of instruction meets this standard.
- b. SAFETY: Accidents are an unacceptable impediment to Army missions, readiness, morale, and resources. Decision makers at every level will employ risk management approaches to effectively preclude unacceptable risk to the safety of personnel and property affiliated with this course.
- c. OPERATIONAL ENVIRONMENT (OE) : The learning objectives in the Army training must comply with current Joint, Army, and Branch doctrine regarding the Operational Environment (OE) and Opposing Force (OPFOR) scenarios. This POI addresses this principle and incorporates current doctrine and lessons learned at the appropriate level, divesting of obsolescence, and implementing full spectrum operations in the OE in classrooms and training exercises.
- d. MEDICAL SUPPORT TO TRAINING: Installation commanders and school commandants will assess and certify the adequacy of medical school to training at least annually. This responsibility is not delegable. Installation commanders and school commandants conducting high-risk training shall rehearse their medical support (casualty response, evacuation, and treatment) plan at least annually, focused on responding to a training catastrophe. This program of instruction complies with the intent of the Army's Medical Support to training policy
- e. LESSONS LEARNED. Competent leaders must understand and apply the techniques and procedures that produce the best possible performance. The Center for Army Lessons Learned(CALL) collects and analyzes data from a variety of current and historical sources, including Army operations and training events, and produces lessons for military commanders, staff, and students. The Transportation School draws upon the CALL resource as well as from experienced staff and faculty to inculcate the most recent operational and OE lessons learned, particularly those lessons related to the Overseas Contingencies Operations (OCO) and survival on the battlefield, into resident and non-resident training materials. This Program of Instruction (POI) complies with this objective.

**Course Description:**

The Fundamentals of Test and Evaluation course emphasizes basic DoD test and evaluation (T&E) principles, policies, processes, and practices. TST 102 covers the integrated T&E processes outlined in the Defense Acquisition Guidebook; and this course provides the essential foundation knowledge needed by T&E careerists and others to more effectively participate in DoD T&E activities.

Method of Delivery: Distance Learning

Objectives: Students who successfully complete this course will be able to:

- o better understand the role of T&E functions within the DoD acquisition framework and more effectively interact with program office personnel regarding basic T&E processes;
- o describe the role of T&E as a feedback and risk reduction mechanism and its relationship to systems engineering and the development process;
- o understand DoD T&E policies, processes, and procedures, including how a test and evaluation strategy (TES) and a test and evaluation master plan (TEMP) are developed and used; and
- o outline the four stages of testing and describe key activities that should occur within each stage.

Target Audience: This course is part of the Level I certification training requirement for the Test & Evaluation career field. Additionally, as a basic introduction to T&E, it is suitable for personnel in other technical acquisition management and program management positions who want to understand more about T&E and the critical role it plays in system acquisition.

CLL 008 DESIGNING FOR SUPPORTABILITY IN DOD SYSTEM  
 Army UNKNOWN

**Course Description:**

Designing for Supportability in DoD Systems provides a comprehensive overview and introduction to incorporating the principles of systems engineering throughout the system life cycle to design, develop, produce, and sustain operationally reliable, supportable, and effective systems. It is based on the Office of the Secretary of Defense guidance, "Designing and Assessing Supportability in DoD Weapon Systems: A Guide to Increased Reliability and Reduced Logistics Footprint" (published Oct. 24, 2003). The module emphasizes the essential link between overall weapon system operational effectiveness and product support performance. It introduces the system operational effectiveness model and process. It demonstrates how consistent application of the system operational effectiveness process, during all phases of the acquisition life cycle, facilitates the optimization of system supportability and operational effectiveness.

This module is required for certification in the SPRDE-SE career field/path at Level III

Description

Intermediate Cost and Price Analysis continues to build upon the fundamental contract pricing principles covered in the Level I Contracting curriculum, Contract Pricing Reference Guide, and DOD Policy. The course is divided into three segments addressing contract pricing issues from a Pre-Award, Negotiation Preparation-Award, and Post-Award perspective. In the course students will be introduced to quantitative techniques and tools used to quantify and facilitate decision making in determining a fair and reasonable price. Students will apply various cost analysis techniques and quantitative tools to analyze a contractor's cost proposal and to develop a government negotiation range and objective. The course is designed to prepare students for follow on DAWIA Level II certification courses, serve as a gateway into more advanced targeted contract pricing courses, and give the students some practical tools in pricing government contracts. The ultimate objective of the course is to help students become better business advisors in developing contract arrangements that are in the best interest of the government.

This module describes the analytical theory of LORA and its economic and non-economic factors. It describes the steps in conducting LORA as well as policies and processes that have shaped, and still guide, its implementation. The module also provides a detailed explanation of how LORA models are designed and how input data is structured. The module discusses how LORA develops a least-cost maintenance recommendation and how those costs are estimated.

The NDU iCollege's Advanced Management Program (AMP) has been renamed the Chief Information Officer Leadership Development Program (CIO LDP for short). After 50 cohorts graduating from the AMP since 1990, the college has recrafted the program to better meet the needs of today's workforce. The CIO LDP has the major components of a multi-week program where students cover teambuilding, leadership, domestic field studies, policy, technology, and more. Students graduate with a CIO-LDP diploma and a CIO certificate from the iCollege. The CIO LDP remains the iCollege's flagship resident program for rising senior-level managers and leaders responsible for promoting and attaining national and international security goals through the strategic use of information and information technology. This program is administered in a multi-week intensive, and highly interactive, student-centered educational experience emphasizing leadership skills and abilities. CIO LDP students form a learning community that fosters multiple perspectives on a wide range of issues. The CIO LDP curriculum provides participants with the Chief Information Officer certificate as well as course work toward the Master of Science in Government Information Leadership (CIO Concentration). Successful CIO-LDP graduates will be able to: 1) Leverage CIO policy and organization competencies to lead within and across federal organizational boundaries by linking critical decisions regarding resources, people, processes, and technologies to mission performance, 2) Balance continuity and change in the development, implementation, and evaluation of government information resources and management strategies and policies while meeting legislative and executive mandates, 3) Demonstrate abilities to construct and implement mission-aligned information and communication technology strategies [including gathering, analyzing, and reporting data; making decisions; implementing decisions; and evaluating organizational performance] in an ethical manner, and 4) Communicate at the strategic level demonstrating command of the topic, logical organization, compelling argument, and excellence in English grammar and syntax.

**Arrivals**

Arrivals The IMSO will pick up all IMS arriving to the Richmond International Airport except those arriving on a US Holiday and those who get rental cars from the airport. There are several taxis at the airport, but it is recommended that you use the James River taxi service as they are the most cost effective. All IMS arriving at midnight or later or on a US Holiday, will take a taxi from the airport to the IHG Army Hotel. The cost of the fair should be approximately 36.00 if you use James River Taxi. Request a receipt from the driver. Upon arrival to the IHG Army Hotel front desk, they will have a welcome bag for you.

**Departures**

Every IMS will complete an out processing sheet. The out processing sheet will be placed in your IMSO mailbox. The out processing sheet, your ID card and all dependent ID cards must be turned in to the IMSO on graduation day. Transportation to the airport is at the student s expense. Students who receive TLA from this training location will receive your taxi allowance in your last pay. Upon settling your voucher in country, you will need to have a copy of the taxi receipt as proof of payment, if not you will owe.

The medical treatment facility on Fort Lee is the Kenner Army Health Clinic. Refer to the ITO to determine where the IMS and dependents will receive medical care.
