Strategy is a preference for a broad view, at the expense of the details Preference for the long term, over the short term and immediate Preference is given to diagnosing the causes and sources, over dealing with symptoms and pathologies

### **Strategy - Suggested Definition:**

An endless process in which you are embarrassed by your place in relation to your aspirations and desires, clarifying and exploring in a whole and broad way yourself and your environment, in a way that allows you to create a solution and find a new way whose purpose is to change reality and move you towards fulfillment. And so on

Endlessness

**Embarrassment** 

### Embarrassment – "A feeling of confusion and hesitation usually following an unexpected situation."

(The Hebrew Language Academy)

A feeling that may be caused as a result of a crisis, shock, surprise, a significant crossroads and etc. Threshold conditions in order for the commander to be willing to invest time and attention in the process.

# Endlessness – "The boundless reality of time or space."

(The Hebrew Language Academy)

The commander's continuous, unremitting effort in the face of an ever-changing reality. The commander is in a process without an unequivocal beginning or end.

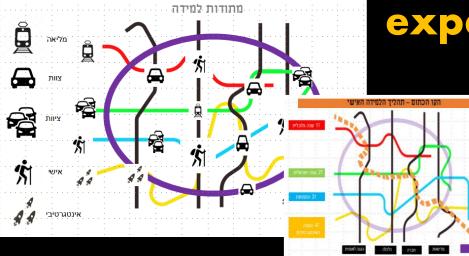

## Creation – "A work or a fruit of labor that has something new in it".

(The Hebrew Language Academy)

The commander can not longer rely exclusively on the existing or on the experience of the past. He needs ingenuity.

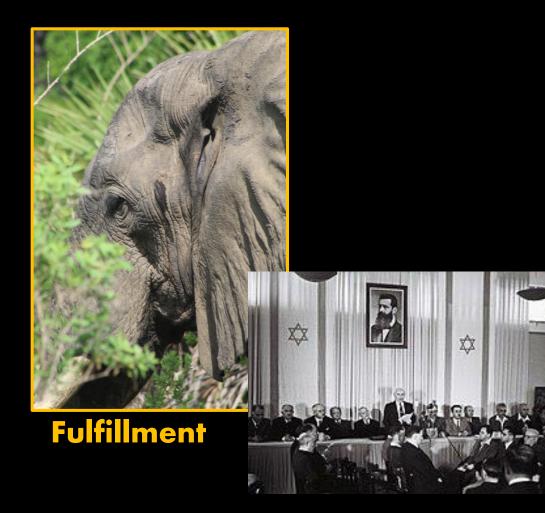

### Action – "Act, doing for some purpose". (The Hebrew Language Academ

The process should lead to an intervention in reality. An intervention designed to change the environment in which the commander operates and of which he is a part.

Action

## Fulfillment – "Taking something from the power to the action, realization"

(The Hebrew Language Academy)

The emergence of a new, improved reality, which is more in line with the commander's aspirations and goals.

## Conclusions

Although the virus is spreading around the world and has historical dimensions (extent of deaths, economic damage), Israel and the IDF are not waking up! We refrain from taking the necessary steps in order to curb the spread of the pandemic in Israel or at least to prepare in advance of its spread.

## Conclusions

2

While Israel is waking up late to a broad national crisis and dealing with it for several months, the IDF is busy maintaining itself and is dragged to play a key role at the national level only in the last stages of the crisis and is officially authorized to do so only in toward its decline.

## Conclusions

Key Significance - Perhaps, missing the opportunity to act before the command-andcontrol crisis and to act at the national level in a way that would have provided a remedy for the civil distress and would have reduced the scale of the crisis in the country.

The IDF takes an "all or nothing" approach

## IDF - Israel's War Army?

The IDF's Purpose! For this we were built, We prepared for that, We are required to win! The main question is how -"War Machine"

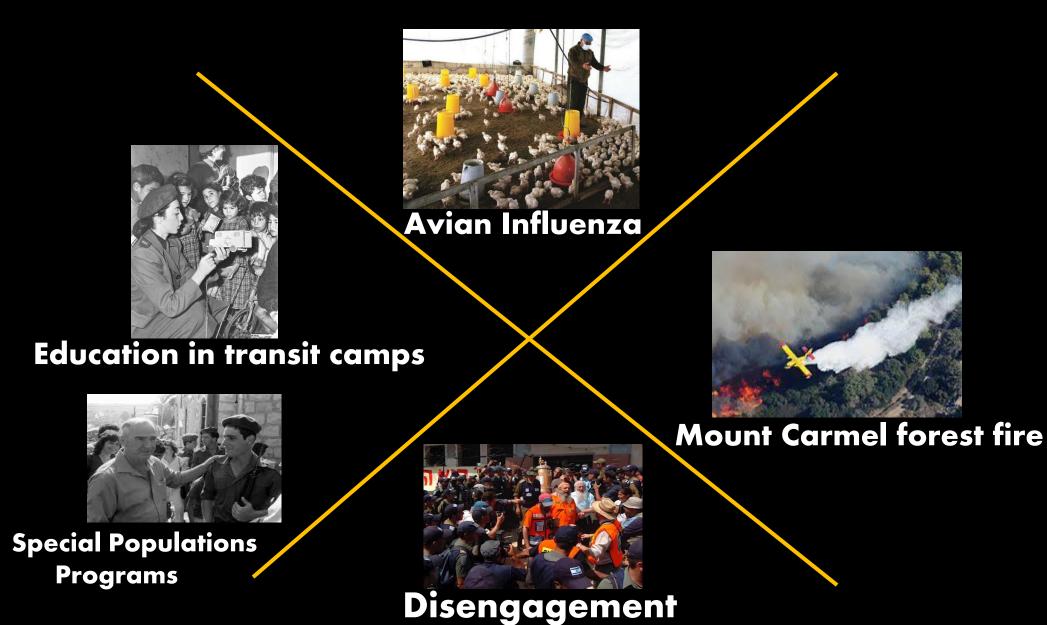

## IDF - Israel <u>Defense</u> Force!

- "There will be purity of arms, loyalty and devotion to the affairs of the nation, zealous adherence to Israeli morality - of the Hebrew Defense, the fire pillar, going before the Israel Defense Forces camps".
- From Ordinance on the inauguration day of LTG Yaakov Dori

### IDF - Israeli <u>Defense</u> Force!

## IDF - Israeli <u>Defense</u> Force!

Over the years, the IDF has been able to engage again and again with questions that shape its identity and has made good use of its relative advantages ("degrees of freedom") for the purpose of realizing national goals, even without accepting official and comprehensive responsibility. In the current crisis, the IDF has chosen a narrow definition of its national role (either authority or responsibility).

"The best resources of the State of Israel have been invested in us for 72 years. It's time to give back."

### What did we do with the investment?

We have developed operational capabilities

We have developed command-and-control capabilities

We have developed logistical capabilities

We have developed strategic learning and decision-making capabilities

Recruitment of the best human capital and cultivating moral leadership

We have developed computing and information processing capabilities
